

## integrated intelligence

### data centre shut down

More and more businesses are planning data centre consolidation projects to achieve optimal IT value for both themselves and their customers.

Prior to embarking on such projects it is imperative to understand what is will be in scope. During the implementation phase of any consolidation project, staff retention can also be an issue, compromising your ability to meet internal or external Service Level Agreements and service expectations.

Ari can manage the relocation and consolidation process from the project inception to its successful conclusion. Our Operators on Demand service gives the confidence to continue to deliver your current service whilst working through the different phases of your project and can be used to provide staff with the right skills for each phase.

Ari also offers a comprehensive computer room strip out and fully auditable disposal service. Together with our partners, we guarantee data and software destruction (in accordance with the Data Protection Act) using SEAP approved methods and disposal of hardware compliant with WEEE (Waste Electrical and Electronic Equipment directive 2202/96/EC). Ari services meet all the requirements of the Hazardous Waste regulations.

**At Ari we deliver a cost effective, quality led portfolio of services covering Data Centre Management, Staffing Services and Project Management.**

We have a vision to do more for our customers than just provide staff to deliver hands and eyes services. We believe that the key to success is, in fact, the success of our customers. This approach has led to many years of steady growth and profitability with many satisfied customers.

**Data Centre Shut Down is just one of Ari's areas of expertise. We can also help you with:**

- > Data Centre Management
- > Data Centre Audits
- > Project Management Services
- > Operators on Demand
- > Intelligent Hands and Eyes
- > Media Management
- > Technical Operations
- > Policy and Procedural Audits
