

## integrated intelligence

### media management

A multitude of global legislation and Corporate Governance initiatives require the safe and regular storage of increasingly more data. Most organisations are clear about the need to protect this most important asset as data is the lifeblood of your organisation and the sheer volume of data involved can be huge. Protecting the data and making sure that you always have access to it are important challenges in ensuring your business continuity and systems available availability.

An integral part of any backup strategy should incorporate onsite/offsite data backups to safeguard against potential local disasters whether of a technical nature or through instances such as fire, theft or flood.

Ari understands the complex challenges faced in designing and maintaining a successful data back up and protection plan. Our aim is simply to provide cost effective and robust management of your backup environment and to ensure efficient restores of your critical business data when it is required.

This service is often combined with our Intelligent Hands & Eyes support which leverages greater cost efficiencies across your Data Centre domains.

**These tasks include, but are not limited to:**

- > Providing 24/7 administration for your back-ups
- > Maintaining a fully tested back-up and recovery system
- > Mounting/dismounting, labelling and maintenance of back-up and store/restore media
- > Maintaining the tape pools for adequate supply and retention
- > Identifying poor quality media and resolving/replacing
- > Status reports for the daily back-up job
- > Ensuring you have the highest possible success rate of your back-ups and restores
- > Sending and receiving media stored offsite, working with a third party
- > Maintaining media databases and vaults
- > Preparing third party media orders
- > Responding to ad hoc requests

**At Ari we deliver a cost effective, quality led portfolio of services covering Data Centre Management, Staffing Services and Project Management.**

We have a vision to do more for our customers than just provide staff to deliver hands and eyes services. We believe that the key to success is, in fact, the success of our customers. This approach has led to many years of steady growth and profitability with many satisfied customers.

**Media Management is just one of Ari's areas of expertise. We can also help you with:**

- > Data Centre Management
- > Data Centre Audits
- > Project Management Services
- > Operators on demand
- > Data Centre Shut Down
- > Intelligent Hands and Eyes
- > Technical Operations
- > Policy and Procedural Audits
