operators on demand

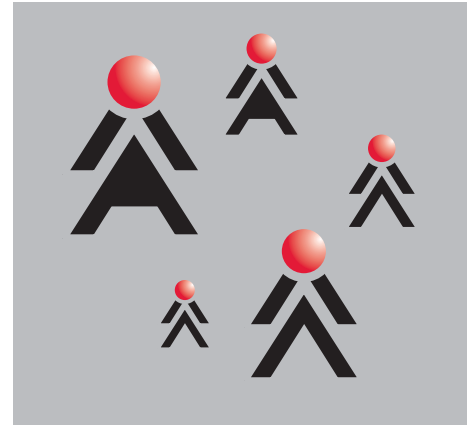

When it comes to the Data Centre delivering the service your business needs, operational staff are the key, but maintaining optimum levels of trained, competent and efficient operators can be a time-consuming management function.

You may have someone absent on long term illness or maternity leave; someone transitioning between two sites and existing resources stretched to the maximum; relocating to a different part of the country and permanent staff have not yet been recruited and trained; or you may simply be growing faster than you anticipated.

Ari has access to a vast pool of interviewed and vetted operators. Many will be currently working for Ari or will have worked for us in the past. Whether you need a single operator for a day, or a team for a few weeks, we can provide you with the skills your business needs. Our service offers the flexibility, quality and value proposition demanded by business today.

Some of the skills available are:

- > Project Managers
- > System Managers
- > Technical Operators
- > Operators
- > Media/Tape Librarians

At Ari we deliver a cost effective, quality led portfolio of services covering Data Centre Management, Staffing Services and Project Management.

We have a vision to do more for our customers than just provide staff to deliver hands and eyes services. We believe that the key to success is, in fact, the success of our customers. This approach has led to many years of steady growth and profitability with many satisfied customers.

Operators on Demand is just one of Ari's areas of expertise. We can also help you with:

- > Data Centre Management
- > Data Centre Audits
- > Project Management Services
- > Data Centre Shut Down
- > Intelligent Hands and Eyes
- > Media Management
- > Technical Operations
- > Policy and Procedural Audits
